

Nifty100 Financial Intelligence Platform - Project Documentation

Overview

Financial intelligence platform built on PostgreSQL, Django REST Framework, React, and Power BI.

Architecture

ETL -> PostgreSQL Warehouse -> Django REST API -> React Frontend -> Power BI Analytics.

Database Tables

dim_company
fact_profit_loss
fact_balance_sheet
fact_cashflow
fact_metrics
fact_health_scores
fact_forecasts
fact_analysis
fact_peers
fact_documents
fact_pros_cons

Backend

Django, DRF, PostgreSQL, SimpleJWT authentication with 24-hour access tokens.

Frontend

React + Vite + TailwindCSS + Recharts + Axios + React Router + Framer Motion.

Features

Company search
Financial metrics
Health scores
Forecasts
Peer analysis
Pros/Cons analysis
Annual report links
JWT authentication

Power BI

Executive dashboard, KPI cards, company slicers, trend charts, financial analysis views.

Current Status

Data warehouse operational, Power BI connected, dashboard pages under development.
